Education

University of Central Oklahoma | Bachelor of Science in Computer Science — Edmond, OK | Expected Dec. 2027

Oklahoma City Community College | Associate of Science in Computer Science — Oklahoma City, OK | 2024 – 2025

Relevant Coursework: Linear Algebra, Discrete Mathematics, Software Engineering, Computer Organization & Architecture II, Digital Logic, C++ Programming, Cybersecurity, Statistics, Software Development

Projects

FeeshTank | *Twitch Donation App (Client Project)* — 2026

Tech Stack: TypeScript, React, Node.js, Docker, Railway

- Built a Twitch donation app where viewers draw a fish that swims across the stream through an OBS overlay once approved by the streamer.
- Led requirements elicitation with the client, defining core feature sets including donation tiers and hold-until-approved payment processing.
- Architected application structure and designed user interfaces in collaboration with a graphic designer and the client.
- Executed security audits and code reviews throughout development to ensure code quality and maintainability.

Custom Alerts Discord Bot | *Client Project* — 2026

Tech Stack: Python, Discord API, Twitch API

- Gathered requirements from a streamer group community's organizer and built a private bot posting reactive embed alerts when members go live on Twitch.
- Enabled custom organizer configurations for member profiles, including tailored embed colors and direct stream redirection buttons.
- Automated stream status tracking to update alerts upon stream conclusion with final title, category, and total duration.
- Deployed and maintained the bot on a 24/7 cloud instance serving active community notifications.

Technical Skills

Languages: Python, Java, C++, TypeScript, HTML, CSS

Frameworks & Libraries: React, Node.js, Tailwind CSS

Databases: SQL

Tools & Infrastructure: Git, GitHub, Docker, Railway

Experience

DoorDash Delivery Driver — Oklahoma City, OK | 2024 – Present

Part-time job during studies
