Education

University of Central Oklahoma — Edmond, OK
Bachelor of Science in Computer Science, GPA: 3.66 — *Expected Dec. 2027*

Oklahoma City Community College — Oklahoma City, OK
Associate of Science in Computer Science — *2024 – 2025*

Relevant Coursework: Linear Algebra, Discrete Mathematics, Software Engineering, Computer Organization & Architecture II, Digital Logic, C++ Programming, Cybersecurity, Statistics, Software Development

Upcoming Coursework: Artificial Intelligence, Machine Learning, Deep Learning

Projects

FeeshTank | *Twitch Donation App (Client Project)* — 2026

Tech Stack: TypeScript, React, Node.js (Fastify), PostgreSQL, Stripe, WebSockets, Docker, Railway

- Built a Twitch donation app where viewers draw a fish that swims across the stream through an OBS overlay once approved by the streamer.
- Led requirements elicitation with the client, defining core feature sets including donation tiers and hold-until-approved payment processing.
- Architected application structure and designed user interfaces in collaboration with a graphic designer and the client.
- Executed security audits and code reviews throughout development to ensure code quality and maintainability.
- Wrote unit and end-to-end tests with Vitest and Playwright covering webhooks, tank logic, and the full donation flow.

Custom Alerts Discord Bot | *Client Project* — 2026

Tech Stack: Python, discord.py, Twitch API, Google Cloud

- Gathered requirements from a streaming community's organizer and built a private bot posting live embed alerts when members go live on Twitch.
- Enabled custom organizer configurations for member profiles, including tailored embed colors and direct stream redirection buttons.
- Automated stream status tracking to update alerts upon stream conclusion with final title, category, and total duration.
- Deployed and maintained the bot on a Google Cloud VM running 24/7 for the community's live notifications.

Technical Skills

Languages: Python, Java, C++, TypeScript, HTML, CSS

Frameworks & Libraries: React, Node.js, Tailwind CSS

Databases: PostgreSQL

Tools & Infrastructure: Git, GitHub, Docker, Railway, Google Cloud, OpenSpec

Experience

DoorDash Delivery Driver — Oklahoma City, OK | 2024 – Present
Part-time job during studies
