Education

University of Central Oklahoma — Edmond, OK
Bachelor of Science in Computer Science — *Expected Dec. 2027*

Oklahoma City Community College — Oklahoma City, OK
Associate of Science in Computer Science — *2024 – 2025*

Relevant Coursework: Linear Algebra, Discrete Mathematics, Software Engineering, Computer Organization & Architecture, Digital Logic, C++ Programming

Projects

FeeshTank — Twitch Donation App | *Client Project*

- Built a Twitch donation app where viewers draw a crayon fish that swims across the stream through an OBS overlay once the streamer approves it.
- Led requirements elicitation with the client, turning an early idea into a defined feature set, including donation tiers and hold-until-approved payments.
- Chose the application architecture and tech stack based on the client's requirements.
- Collaborated with a graphic designer and the client to bring the visual design into the finished product.
- Ran security audits and reviewed code throughout development to keep the codebase secure and maintainable.

Mimi — Discord Stream Alert Bot | *Python, Discord API, Twitch API, Google Cloud* — 2026

- Gathered requirements from a VTuber community's organizers and built a private bot that posts rich-embed alerts to Discord when members go live on Twitch.
- Let organizers add their own members, each with a custom embed color and a button that takes viewers from Discord straight to the stream.
- Automatically updates each alert when a stream ends with the final title, category, and stream duration.
- Deployed on a Google Cloud VM running 24/7 as the community's live-notification system.

Experience

DoorDash — 2024 – Present
Dasher (Independent Contractor) — *Oklahoma City, OK*

- Plan routes and manage multiple concurrent orders under tight delivery windows using the Dasher app.
- Resolve order issues directly with customers and merchants to keep deliveries accurate and on time.
- Self-manage schedule and earnings as an independent contractor while completing a full-time CS course load.

Technical Skills

Languages: Python, Java, C++, HTML, CSS

Frameworks: React, Tailwind CSS

Developer Tools: Git, GitHub
